

# Construction Alert:

## Phoenix: Sutton Place

### Beginning soon

Southwest Gas has contracted with Arizona Pipeline to replace the existing natural gas infrastructure and abandon or replace associated services in Sutton Place community at Osborn Road and 26<sup>th</sup> Street. This work is estimated to be complete June 2021. Current Southwest Gas customers should not experience a disruption in service, unless notified.

### You can expect:

- Utility locators to mark existing utilities before construction begins and crews to document existing conditions.
- Crews to coordinate work near driveways and side streets to provide access to residences.
- For Southwest Gas customers, **ProPipe, a subcontractor to Arizona Pipeline, may video inspect residential sewer lines to ensure they are conflict free. Crews will need access to the existing gas meter locations on your property.**
- Work to take place during daytime hours, Monday through Saturday; however, traffic control will remain in place 24 hours to protect the work area.
- Roads to remain open for travel; however, a flagger operation may be in place to assist travelers through the work area. Signage may be in place to restrict parking near the work zone.

Southwest Gas is committed to providing its customers with safe and reliable natural gas. For additional information, contact our project hotline at **602.532.6100**.

**Thank you for your patience during this construction.**
