

A Special Message From

SOUTHWEST GAS

Southwest Gas is embarking on an updated annual natural gas pipeline survey process that will increase the presence of our field contractors throughout Nevada. This activity may require access to the meter on the side of your home or business.

If a gas meter is inaccessible, the contractor will leave a door hanger requesting the resident to contact either Heath or Hydromax to schedule a time to return and complete the survey. As a reminder, all Southwest Gas technicians and approved contractors carry identification cards.

More information on gas and safety information can be found at <https://www.swgas.com/en/safety>.
