SOUTHWEST GAS
smarter > greener > better

Your Multi-Family Property Can Be Greener Than You Think!

According to a recent consumer energy preference survey, more than 70% of homeowners prefer natural gas for heating, water heating, and cooking. By upgrading to high-efficiency natural gas equipment, you can achieve significant potential energy and cost savings, while providing desirable features that will retain and attract valuable tenants.

The Benefits of Installing Natural Gas Equipment

For Property Owners

- Enhance property value and marketability
- Lower operating and maintenance costs
- Retain and attract valuable tenants
- Improved energy savings can free up budgets for additional improvements and upgrades.

For Tenants

- Lower energy bills
- Better performing, energy-efficient equipment
- Superior comfort, convenience and reliability
- Environmental benefits and a greener complex

Southwest Gas is pleased to offer the following **Smarter Greener Better®** rebates for multi-family properties.
