Get Better with CR Herro

Top 10 Home Energy Efficiency
No-Brainers with APS, SRP & SWG

I Did It. You Can Too.
with ASU's Mick Dalrymple

Tickets: \$10

Though a Jetsons-esque house in which Rosie the Robot cheerfully pampers happy humans isn't real life, experts say the next decade holds tremendous promise in terms of home performance innovations to make family homes smarter, cheaper to run and more healthy to live in.

Join acclaimed building industry expert, author of *The Greened House Effect*, and television and radio host, Jeff Wilson, the Energy & Environmental Building Alliance and its Supporting Partners for an in-depth tour into your home.

Wilson explores and presents the solutions to increase the performance and efficiency of existing homes, making them seem possible for average homeowners and contractors by offering the right balance of information, sills, financing strategies and materials.

Continue exploring high performance homes and the future of your home with local opportunities and incentives. Through three action-packed learning labs, attendees will gain access to the What if's, How To's and Why's of:

Getting a Green Home is talked about in the media, but what are the real tools for an average person to reduce operating cost, improve comfort, and make their homes healthy?
