

Your Safety Our Priority

February 2011

Delivering safe and reliable natural gas every day to meet the energy needs of our customers is what we do best.

Our commitment to safety:

- We routinely patrol, test, repair, and replace our pipelines to ensure the highest level of safety and reliability;
- We meet or exceed all federal and state requirements and standards for safe pipeline operation and maintenance; and
- We regularly communicate and train with emergency responders to remain prepared for any natural gas emergency.

Natural gas pipeline leaks can still occur due to natural disasters, corrosion, and careless or unsafe excavation. Natural gas leaks may lead to evacuations, service outages, ignition, property damage, injury, or loss of life. So, if you ever suspect a natural gas leak, call 911 and Southwest Gas right away.
