

Helpful everyday energy-saving tips:

Change or clean your furnace filters as directed by the manufacturer.

Select pots and pans that fit the burners on your range.

Separate lightweight and heavy fabrics when drying laundry.

Cook outdoors on a natural gas grill in the summer to keep your kitchen cool.

Set the thermostat on your water heater to 120°F.

Even paying bills can be greener than you think

Sign up for Paperless Billing through MyAccount to save time, money and trees. If 20% of American households viewed and paid bills online, the collective impact would save 1,811,275 trees each year.

SOUTHWEST GAS

Natural gas makes your home greener than you think

Natural gas assures you of comfort that's affordable and reliable. It's preferred by homeowners who want to help save energy, reduce emissions and protect the environment.

SOUTHWEST GAS

What natural gas brings to the table...

Dependable –

Unlike wind and solar, natural gas doesn't depend on the weather and is readily available with a hundred-year supply right here in America. More than 99% of the natural gas we use is produced in North America - reducing reliance on foreign imports.

Convenient –

Natural gas storage water heaters, tankless water heaters, clothes dryers, and cooktops are highly efficient and easy to use. With a turn of the knob you can have an endless supply of hot water, precise temperature control for cooking, and faster drying time for laundry.

Comfortable –

Heat from a high-efficiency natural gas furnace circulates quickly, creating cozy warmth without the damp, cool draftiness associated with an electric heat pump.

Cleaner for the environment –

The carbon footprint of a natural gas home is an average of 43% less than an electric home using the same appliances.
