

Save Money and Energy with Solar Water Heating

Use the sun — a clean, renewable energy source to heat water and start saving. Solar water heating systems are environmentally responsible and a great alternative to conventional water heating methods. By replacing your old water heater with a solar water heater, you can:

- Cut the cost of heating water in half
- Save up to 40% of natural gas used to heat water
- Go green and preserve the environment by reducing greenhouse gas emissions

The Smarter Greener Better[®] Solar Water Heating Program

Southwest Gas offers the following rebate incentives to qualifying customers who install solar water heating systems with a natural gas back-up. Visit www.swgasliving.com/nvsolar for rebate information, program requirements, and list of program authorized contractors.

Solar Water Heating Systems*	Rebate Amount
1. Residential	Up to 30% of system cost or up to \$3,000
2. Small Business	Up to 30% of system cost or up to \$7,500
3. Schools, Public or Other	Up to 50% of system cost or up to \$30,000
*Pre-approval required. Must be installed by a program authorized contractor.	

*Program participation dates are subject to funding availability and may change without notice. Program and submission deadline dates will be updated on the Southwest Gas website. Applications must be submitted prior to purchasing and installing a system (applications received after installation will be denied). Equipment must be purchased and installed on or after January 1, 2013 and must be installed by a program authorized contractor.
