

Special Discount Offers

on natural gas grills and accessories

If you're considering a stay-at-home vacation, a "staycation," this summer, don't forget the number one must-have—a dependable natural gas grill. Because natural gas grills are environmentally cleaner than charcoal or wood, more energy efficient, and require less cleanup, they leave you more time to kick back and relax. And isn't that part of a great vacation?

Pack your travel and budget worries away and let the carefree benefits of natural gas outdoor appliances turn your backyard into the perfect staycation destination.

Take advantage of **SPECIAL OFFERS** available through July 31, 2009. Call the Energy Specialists at **1-800-654-2765** for participating dealers in your area that feature special discounts on in-stock natural gas grills and accessories, or visit us at **www.swgas.com** for promotion details.*

April 2009

From the kitchen of: Southwest Gas
Recipe for: Barbecued Meat Loaf

Meat loaf	Sauce
2½ lbs. lean ground beef	½ c. bottled barbecue sauce
1 c. onion, finely chopped	¼ c. ketchup
1 large egg	
1 t. Worcestershire sauce	
2 c. bread crumbs	
1 t. garlic	
1 t. salt	
1 t. fresh ground pepper	

Mix the meat loaf ingredients until thoroughly combined. Divide the mixture in half, form into 2 loaves, and place on a baking sheet.

Combine the sauce ingredients and spread over each loaf. Use a metal spatula to pick up the loaves and place directly on the cooking grate. Grill over indirect medium-low heat (about 300°F) with the lid closed, for about 50-60 minutes. A meat thermometer inserted horizontally through the top of the loaf should read 155°F. Remove from grill and let set for 10 minutes. Cut into ½ inch thick slices and serve with remaining sauce.

Basket full of tips

Did you know that a natural gas dryer saves you time, is gentle on the environment, and your clothes?

Natural gas is nature's most environmentally friendly fossil fuel. Because the direct use of natural gas at the appliance is more efficient than burning natural gas to produce electricity at a power plant, customers who use natural gas dryers help play an important role in conserving our natural resources. This good news means a smaller carbon footprint and cleaner air with natural gas.

Because natural gas dryers heat up faster than electric, their shorter more efficient drying cycles help your clothes last longer, and give you more time to do other things.

Choose natural gas and enjoy cost-effective, convenient, energy-efficient drying. Call our Energy Specialists today at **1-800-654-2765** to see if you have a natural gas dryer connection in your home.

Energy Saving Tip:

Clean the lint filter before drying each load. Cleaning your lint filter regularly will help your clothes dry faster.

Calling Volume

Call volume is heaviest on Mondays at Southwest Gas. If possible, please call our offices Tuesday through Friday for quicker service.

National Volunteer Week April 19 - 25, 2009

Throughout its history, Southwest Gas has actively supported community service activities in Arizona, California, and Nevada. Our company's "fueling good" philosophy of outreach, volunteerism, and philanthropy has benefited many and inspired others to make a difference, too. This year, join us in celebrating National Volunteer Week by extending a helping hand and leading by example. For more information go to <http://www.pointsoflight.org>.
