

Natural Gas Clothes Dryers

By choosing an energy-efficient natural gas dryer paired with an ENERGY STAR washer, you'll reduce your utility bills as well as your carbon footprint.

Did you know that a natural gas dryer is as gentle on the environment as it is on your clothes? When compared to other fuels used to generate electricity, natural gas emits 45% less CO₂ than coal and 30% less CO₂ than oil, which results in cleaner air.

Energy-efficient natural gas dryers also free you from worry about time-of-use electric rates. So, when you're ready to replace your clothes dryer, visit www.swgas.com and click on "Special Offers" to see manufacturer discounts for additional savings.

Fast, Efficient Clothes Drying It's a Natural Choice

Natural Gas Dryers...

- Dry a load of clothes about 20% faster than an electric dryer
- Cost less to operate
- Create less static and reduce wrinkles
- Require less maintenance and last about 15 years or more

Natural gas remains the best energy value and environmentally responsible choice that delivers comfort and convenience. Call the Energy Specialists at **1-800-654-2765** to see if you have a natural gas dryer connection in your home – you'll be glad you did.

MONEY SAVING TIP...

Keep the lint screen clean. Lint buildup obstructs airflow, making your dryer work harder and longer.
