

Natural Gas Appliances

Like warmth and convenience? Like to be energy-efficient? Want to be good to the environment? The wonderful thing about saving energy is you're helping the environment and saving money too. It's like contributing to a good cause and ending up with more money in your pocket. Natural gas appliances are better at conserving energy, reducing costs, and you can use them when you want without worrying about time-of-use rates.

You can enjoy the lifestyle offered by dependable natural gas for all the things it does best – heating, water heating, cooking, and clothes drying. Plus, you can ask for outdoor gas amenities that will transform your backyard into an inviting oasis.

Let the Energy Specialists help you replace your broken and inefficient appliances with high-efficiency Energy Star and natural gas appliances. Call today 1-800-654-2765.

It's a natural choice....

Energy-Efficient

Take comfort in a natural gas furnace. The air is up to 25 degrees warmer than air from electric heat pumps.

Today's natural gas water heaters are more efficient than ever, boasting a 40% faster recovery rate than electric water heaters.

It's no wonder professional cooks prefer natural gas ranges. They offer even heat, precise temperature control, turn on and off instantly, and they're energy efficient.

The more laundry you do, the more you'll appreciate a natural gas dryer. Unlike electric dryers, natural gas dryers provide instant heat. That means your laundry will be done faster, saving you about 50 hours a year in drying time.

Creating style and comfort, with cutting-edge design and technology, today's natural gas outdoor products are the perfect outdoor room solution.
