

Natural Gas Fireplace

Special Offers You Can Cozy Up To

Clean-burning natural gas fireplaces are the environmentally-friendly alternative to wood-burning fireplaces that emit much higher amounts of greenhouse gases and particulate matter. While some gas fireplaces are designed for ambiance and provide radiant heat, fireplace inserts improve efficiency by blowing heat into the room with efficiency ratings as high as 75%.

For a limited time, Southwest Gas customers can receive a special **15% discount** on natural gas fireplace equipment such as gas logs, fireplace inserts, direct vent fireplaces and more. For more information on where you can purchase high-efficiency fireplaces or to see if you have a gas fireplace stub in your home, call our Energy Specialists at **1-800-654-2765**.

Natural gas fireplaces are the natural choice for you and the environment.

Special 15% Discount

Natural gas fireplaces can be easily installed into almost any room in your home. Today's gas fireplaces can be vented through an outside wall or through the roof, without a conventional chimney. That means that you can have a fireplace in your bedroom, kitchen or wherever you are looking to add warmth and ambiance.

This **15% discount** offer is available from **August 1 through October 1, 2010**. Many fireplace dealers are offering discounts on in-stock natural gas fireplaces.* Call our Energy Specialists at **1-800-654-2765** or visit our Web site for promotion details www.swgas.com.

** To receive the discount, please bring this bill insert with you to a participating dealer. May not be used with other offers.*
