

Save Energy and Money this Winter!

NEWS TO USE

December 2014

Everyone loves to save. And Southwest Gas wants to help you save time, energy, and money by offering some simple reminders that can lower your utility bills throughout the busy holiday season:

- Set your heating thermostat to 65°F to 68°F in the winter, health permitting, and lower it when you're away from home.
- Clean the lint screen filter in your dryer after every load.
- Run full loads when washing dishes or doing laundry.
- Change the air filters for your heating system regularly (at least every three months).
- Set the water heater to 120°F for most uses. Set it to "vacation" mode or the lowest setting possible when away from home for one week or more.
- Pre-heat your oven only when necessary.
- Repair leaky faucets quickly.
- Dress for the weather even when you're inside. If it's cold outside, dress in warm layers.

If you're faced with financial difficulty this winter, remember that residential customers who meet certain income guidelines, may qualify for utility assistance through state programs. Additionally, **Energy Share**, an emergency fund that provides assistance to those who qualify, is available companywide. For more information, call 1-877-860-6020.

You can also save with a variety of rebates and promotions, available in most areas. Visit www.swgasliving.com or call 1-800-654-2765 to learn more.

Before you dig, call

UNDERGROUND PIPELINES CAN BE LOCATED ANYWHERE.

If you suspect a natural gas leak,
from a safe place call **911** and
1.877.860.6020 immediately.

ANYTIME. ANYWHERE.
