

Wash, Rinse, Save, Repeat

Natural gas water heaters save time by heating water twice as fast as electric models at a lower cost. This means you save time and money when you wash, rinse and repeat.

WHEN REPLACING A NATURAL GAS WATER HEATER, CONSIDER A HIGH-EFFICIENCY STORAGE TANK WATER HEATER IF YOU:

- Currently have a storage tank water heater
- Are willing to pay a little more up front to reduce water heating bills
- Have a lot of appliances that demand large amounts of water

CONSIDER A TANKLESS WATER HEATER

If you...

- Are building a new home or doing a remodel
- Often run out of hot water
- Want a water heater with a longer life span
- Have space for required venting and plumbing requirements

Tankless water heaters heat water only when needed, reducing water heating expenses while providing a continuous supply of hot water. For more information about natural gas water heaters, visit swgas.com

GET TEXT UPDATES

In the rare instance that your natural gas service is interrupted, Southwest Gas can send you a text message to keep you informed. Opt in at swgas.com through MyAccount or call Customer Assistance at **877-860-6020**.

Our notification service is free. Message and data rates may apply.

We're Here To Help

Residential customers who meet certain income guidelines may qualify for utility assistance through state programs.

Additionally, residential customers may qualify for **Energy Share**, an emergency fund which provides direct utility assistance to qualified customers with unexpected financial difficulties. For more information call **877-860-6020**.

April is Safe Digging Month

Natural gas lines and other utilities can be buried anywhere. That's why every digging project requires a call to 811 at least two working days in advance, even for small projects like planting trees or shrubs. It's easy and it's free.
