

**Cozy and Warm.
No Kindling Required.**

This heating season, be sure to stay warm and comfortable with a convenient, reliable and efficient natural gas heating system.

Today's heating systems offer incredible choices, from top-of-the-line furnaces that achieve efficiency levels of more than 90 percent, to moderately priced units that meet or slightly exceed the minimum efficiency standard of 78 percent.

So, whether you're turning on your heating system for the first time this season or are in the market for a new one, choose reliable, efficient natural gas.

Prepare for cooler weather with a home heating inspection. A properly maintained system will provide many years of reliable operation. Visit swgas.com/rebates or call **800-654-2765** for referrals to contractors offering a special home heating inspection, available in most areas.

Money Saving Energy Tips

- Set your thermostat to 65°F to 68°F in the winter, health permitting.
- Change air filters regularly (at least every three months).
- Seal leaks around doors, windows and other openings with caulking or weather-stripping.
- Dress for the weather, even when you're inside.
- Install a programmable thermostat and set it to accurately follow your schedule.
- Allow sunlight to naturally heat your home during the day by opening curtains on south-facing windows.
