SAVINGS YOU CAN WEAR

When it comes to quality, value and extending the life of your clothing, natural gas is the natural choice. With a natural gas dryer, faster heat up and shorter drying times help protect your family's clothing. And since drying two loads of laundry in a natural gas dryer costs the same as drying one load in an electric dryer, the savings add up.

Here's more ways to save on laundry day:

- Clean the lint filter in between each load
- Do not open the dryer door unnecessarily
- Read garment and fabric care labels for proper settings
