NEED ASSISTANCE? WE'VE GOT SOLUTIONS!

During heating season, call volumes rise — especially on Mondays and the day after a holiday. Yet almost anything an associate can help with, you can do in MyAccount or with the Southwest Gas mobile app.

Learn more by visiting myaccount.swgas.com.

Carbon dioxide equivalent emissions are about **22%** lower for residences using natural gas than all-electric homes.*

Learn more at swgas.com/whynaturalgas.

* 2022 American Gas Association; emissions from space heating, water heating, cooking and clothes drying.

DID YOU KNOW?

SMELL NATURAL GAS? STOP. LEAVE. CALL.

In its untouched state, natural gas is odorless. Southwest Gas adds mercaptan to make natural gas easier to detect, which emits an odor similar to sulfur or rotten eggs.

If you smell natural gas, stop and leave the area immediately. From a safe location, call **911** and Southwest Gas at **877-860-6020**, day or night.

Learn more at swgas.com/safety.
